1. Company Overview

Guangzhou Qiao Yang Zi Cosmetics Technology Co., Ltd. is a cosmetic OEM/ODM and private label supplier based in Guangzhou, China. We focus on practical, market-ready beauty products for international customers, especially hair styling, hair color and hair care categories.

Our work covers product concept confirmation, formula direction, sample preparation, packaging selection, private label design support, bulk production coordination, quality checking and export document support. This allows buyers to develop products under their own brand while keeping product selection, packaging and market positioning flexible.

Company Name	Guangzhou Qiao Yang Zi Cosmetics Technology Co., Ltd.
Business Type	Cosmetic OEM/ODM supplier and private label product partner
Location	Baiyun District, Guangzhou, China
Main Categories	Hair styling, hair color, hair care, skincare, body care, fragrance and related cosmetic products
Main Customers	Brand owners, importers, distributors, wholesalers, salon suppliers, e-commerce sellers and trading companies
Service Scope	Formula direction, sample development, packaging sourcing, private label support, bulk production, QC and export documents

12	ISO 22716	GMPC
Production Lines	Cosmetic GMP Standard	Manufacturing Practice
OEM/ODM	15-30 Days	25+
Private Label Service	Standard Production Reference	Export Market Experience

We aim to make product development simple for customers: choose the product direction, confirm the formula feeling through samples, finalize packaging, then move into production with clear specifications.

2. Product Portfolio

Qyonz supplies both existing product options and custom OEM/ODM development. Customers can start from current product structures or request a custom formula, texture, fragrance, color, packaging and label design.

Category	Product Range	Typical OEM Direction
Hair Styling	Hair powder, volumizing powder, hair building fibers, hairline powder, hair wax, water-based pomade, oil-based pomade, hair clay, mousse, styling spray and edge control	Hold level, matte/shiny finish, texture, fragrance, washability, jar/tin/bottle packaging and private label design
Hair Color	Hair color shampoo, comb hair dye, one-comb dye, apple hair dye gel, plant-style hair dye, hair color wax, hair chalk comb and color protection shampoo	Shade range, gray coverage, application method, processing time, label language and market positioning
Hair Care	Shampoo, conditioner, hair mask, hair oil, scalp care, hair growth elixir, batana oil series, argan oil series, rosemary series and functional hair treatment sets	Hair type positioning, ingredient concept, fragrance, viscosity, packaging size, set combination and export documents
Beauty Care	Skincare, body care, fragrance and related cosmetic private label products	Product concept, formula texture, packaging, label design and documents according to the customer project

Comb Hair Dye

Home-use hair color with comb bottle options

Hair Fibers

Fuller-looking hair support and applicator options

Color Hair Wax

Temporary color styling for fashion looks

Hair Wax

Styling wax, pomade and clay development

3. Hair Styling & Hair Color OEM Focus

For buyers developing a men's grooming or hair color line, the products below can be combined into a practical starter range. Each item can be adjusted by texture, fragrance, hold level, color, packaging and target price range.

Product	Market Use	Customization Options
Hair Powder / Hair Fibers	Instant fuller-hair look, thinning-area coverage, barber shop add-on product and strong before/after visual content.	20-30g bottle, black/dark brown/brown/gray colors, applicator nozzle, fixing spray set, private label and color box.
Water-Based Pomade	Daily men's grooming product with easier wash-out, suitable for barber shops, online stores and repeat purchase.	Hold level 3-5, matte/semi-shine/high-shine finish, non-sticky texture, fragrance, 75g/100g/150g jar or tin.
Oil-Based Pomade	Classic shine and reworkable styling for retro barber positioning and premium grooming sets.	Wax/oil ratio, shine level, scent profile, comb-through feeling, grease control, metal tin or premium jar packaging.
Hair Clay	Matte texture, strong grip and thicker-looking short-hair styling for young male consumers.	Clay/wax balance, dry-touch finish, strong hold, clean scent, 75g/100g/150g packaging.
Hair Color With Comb	Convenient gray coverage and DIY home-use hair color concept, easier to explain than traditional salon dye kits.	Comb-bottle structure, black/dark brown/chestnut options, 200-400ml sizes, botanical or argan oil positioning, multilingual label.

Recommended Starter Line

- Matte texture hair powder or hair building fibers in black and dark brown.
- Water-based pomade with clean wash-out and medium-to-strong hold.
- Oil-based pomade for classic shine and reworkable barber styling.
- Matte hair clay with dry-touch finish and strong grip.
- Comb hair dye in black and dark brown gray-coverage variants.

4. Existing Product Directions

The following product directions are suitable as starting points for sampling or private label development. Exact formula, packaging and label design can be adjusted after the customer confirms the target market and brand positioning.

Product Direction	Common Specification	Private Label Development
Comb Hair Dye	200ml / 400ml comb-bottle options; black, dark brown and related shade directions	Bottle color, label language, outer box, botanical/oil concept and instruction wording
Hair Chalk Comb	20g comb format; black, dark brown, coffee and fashion color directions	Temporary color positioning, retail display, logo label and color box
Hair Building Fibers	Around 27.5g bottle with applicator support; multiple color matching options	Fiber fineness, applicator, fixing spray set, before/after display and claim wording
Hairline Powder	Compact powder format for hairline filling; black, dark brown, brown, gray and related colors	Sponge applicator, mirror compact, box design and shade selection
Hair Wax / Pomade / Clay	75g, 100g, 150ml, 300ml and similar jar/tin formats	Hold level, shine level, matte finish, fragrance, texture and packaging material
Hair Care Sets	Shampoo, conditioner, hair mask, hair oil and treatment set options	Batana, rosemary, argan oil and other ingredient concepts for set development

Hair Color Series

Hair color shampoo, comb dye and color support products

Hair Care Series

Shampoo, conditioner, hair mask and hair oil sets

Functional Hair Set

Batana, rosemary and argan oil concept development

5. OEM/ODM Service Scope

Our service is designed to help customers move from product idea to sample confirmation and bulk production. We can support both existing product references and customized development projects.

Step	What We Confirm	Output for Customer
01 Requirement	Product type, target user, sales channel, country, texture, effect, fragrance, packaging and target price range	Clear product direction and suitable development path
02 Formula Direction	Hold level, finish, color, viscosity, washability, sensory feeling and ingredient concept	Existing formula option or custom sample direction
03 Sample Development	Sample quantity, packaging reference, color/shade and testing focus	Samples for customer testing and feedback
04 Packaging	Bottle, jar, tin, comb-bottle, label, color box, carton and multilingual artwork	Private label packaging solution
05 Production	Confirmed formula, packaging, order quantity, carton packing and production schedule	Bulk production plan and shipment preparation
06 Documents	Product specification, ingredient list, COA, MSDS/SDS and other export documents when required	Document support for buyer's import and sales preparation

Information Needed From Customer

Information	Why It Helps
Product list and reference samples	Helps us choose the most suitable formula direction or development route.
Target market and sales channel	Helps define label language, product claims, packaging style and price positioning.
Quantity and target price range	Helps confirm feasible packaging, MOQ and quotation structure.
Logo, label language and packaging style	Helps prepare private label design, color box and carton requirements.

6. Quality & Cooperation

A good OEM project is not only about choosing a product name. It requires clear product specifications, stable samples, suitable packaging, realistic claim wording and consistent production control. Qyonz supports customers through each of these steps.

Area	Support
Formula & Sensory Control	Hold level, shine/matte finish, texture, spreadability, fragrance, color result and washability can be adjusted according to product type.
Packaging & Label	Jar, bottle, tin, tube, comb-bottle, color box, carton and multilingual label layouts can be selected according to project needs.
Batch QC	Appearance, filling volume, packaging integrity, color, odor, texture consistency and batch records are checked before shipment.
Testing Support	Microbial, stability, compatibility or product performance checks can be arranged depending on formula and destination requirements.
Export Documents	COA, MSDS/SDS, product specification and ingredient list support can be prepared when required for shipment or registration.

Next Step

Please send your product list, target country, preferred packaging, expected quantity, target price range and any reference product photos. We will review the project and provide suitable product options, sample details, production lead time and quotation plan.
